DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-17 and 24, drawn to a wiring board, classified in class 174, subclass 255.
 - II. Claims 18-23, drawn to a method of manufacturing a wiring board, classified in class 29, subclass 832+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions group II and I are related as process of making and product made.

The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process. Plating is a specific method. The terminals can be formed by other known method in the art such as vapor deposition method, instead of plating. Also, the product does not need the step of forming the conductive layers and the insulation layers in an atmosphere at a reduced pressure below the atmospheric pressure.

Art Unit: 2841

3. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

4. If group I is elected, claims 1-17 and 24 are further subject to an election of species, for being drawn to more than a single species, defined as follows. This application contains claims directed to the following patentably distinct species:

Specie 1	Fig 1A.	Specie 18	Fig 13b.
Specie 2	Fig 2.	Specie 19	Fig 14.
Specie 3	Fig 3.	Specie 20	Fig 15.
Specie 4	Fig 4A.	Specie 21	Fig 16.
Specie 5	Fig 5.	Specie 22	Fig 17A.
Specie 6	Fig 6A.	Specie 23	Fig 18.
Specie 7	Fig 6C.	Specie 24	Fig 19A.
Specie 8	Fig 6D.	Specie 25	Fig 20A.
Specie 9	Fig 6E.	Specie 26	Fig 21A.
Specie 10	Fig 6F.	Specie 27	Fig 21C.
Specie 11	Fig 7A.	Specie 28	Fig 22.
Specie 12	Fig 8A.	Specie 29	Fig 23A
Specie 13	Fig 9A.	Specie 30	Fig 24A.
Specie 14	Fig 10A.	Specie 31	Fig 24B.
Specie 15	Fig 11.	Specie 32	Fig 25.

Specie 16	Fig 12A.	Specie 33	Fig 26.
Specie 17	Fig 13A.	Specie 34	Fig 29A.

The species are independent or distinct because they have different structural configuration with various combinations.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

5. Because of the complication of the requirement a telephone call was not made to request an oral election.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103 (a) of the other invention.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
